

Kunal Deore

Pune, Maharashtra, India | +91 8767263557 | patilkunal0457@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Pimpri Chinchwad University (PCU), Pune

Expected 2026

Master of Computer Applications (MCA) | CGPA: 8.4

R.C. Patel ACS College, Shirpur

2021 – 2024

Bachelor of Science in Computer Science | CGPA: 9.32

EXPERIENCE

Android Developer Intern (Virtual) — Google for Developers (Eduskills / AICTE)

Oct – Dec 2024

Remote

- Built Android application modules in Java using OOP principles and Agile SDLC, integrated RESTful backend APIs into responsive UI components across multiple sprint cycles.
- Managed source code with Git/GitHub — branching, pull requests, and code review; delivered unit-tested, performance-optimized, and well-documented features.

PROJECTS

Post Application - Android Social Platform [GitHub](#)

Tech Stack: Java, Firebase, Android SDK, REST APIs, Agile

- Developed a full-stack Android application with Java and Firebase Realtime Database; implemented secure user authentication, real-time CRUD operations, and 99.9% data availability for user profiles.
- Applied data structures and query-optimization strategies, reducing load time by 30%; followed Agile practices with continuous iteration, testing, and debugging.

Krushishop - Agro Retailer Billing & Inventory System [Live](#)

Tech Stack: React (Next.js), TypeScript, NoSQL(Insforge), REST APIs, CSS, WebSockets

- Developed a full-stack retail management system using React & Next.js and Insforge, enabled real-time billing, inventory, and Udhara tracking with secure auth and optimized relational database schema.
- Implemented event-driven updates and modular components, reducing data latency by ~30%, built invoice, supplier settlement, and multilingual (i18n) features following clean code and scalable design principles.

Yuvantara - Smart Campus Placement & Management System (AI-Powered) [GitHub](#)

Tech Stack: Node.js, Express.js, MongoDB, Python, Streamlit, OpenCV, REST APIs

- Built a full-stack AI-powered placement platform using Node.js and Python; implemented JWT-based authentication, role-based access, and modules for aptitude testing, coding evaluation, and interview simulation
- Integrated AI features like proctoring, resume analysis, and mock interviews using OpenCV and APIs applied microservice architecture, optimized database operations, and modular design for scalable performance.

TECHNICAL SKILLS

Languages:	Java, Python, C++, JavaScript, TypeScript, SQL, HTML & CSS
Backend & Frameworks:	Flask, Django, Node.js, RESTful APIs, Firebase Cloud Functions
Databases:	MySQL, PostgreSQL, MongoDB, Firebase Realtime Database
Tools:	Git, GitHub, Postman, VS Code, Android Studio, Docker (Basics)
Core Concepts:	OOP, Data Structures & Algorithms, Agile/Scrum, SDLC, Unit Testing, Debugging, Version Control, CI/CD (Basics)
AI / ML:	Machine Learning (Scikit-learn), Generative AI
Cloud Basics:	AWS (EC2, S3 - Basic), Microsoft Azure Fundamentals

CERTIFICATIONS

- Web Technologies and Security - Coursera
- Microsoft AI and Machine Learning Engineering - Coursera
- UI / UX Design - Coursera
- Generative AI Automation - Coursera

ACHIEVEMENTS

- TechnoCase 2024 - Gold Medalist:** State-Level Case Study & Programming Competition; awarded Gold Medal for presenting an innovative programming solution among statewide participants. (Jan 2024)
